

CONSTRUCTION SAFETY

The Board of Education recognizes the district's responsibility to provide a safe school environment for students and staff during construction and maintenance projects.

and health of students and staff are consistent with state law and Uniform Code of Public School Building Inspections, Safety Rating and Form Safety Standards for School Construction and Maintenance. The Superintendent shall be responsible for the following items at the construction project:

Pre-Construction

1. Ensure proper planning for the safety of building occupants during construction or maintenance activities.
2. Hire a New York State licensed architect or engineer for projects costing more than \$35,000.
3. Review and approve all construction documents.
4. Provide notice to parents, staff and the community in advance of any construction project costing \$35,000 or more to be conducted in an occupied school building. The notice is to be given at least two months prior to date on which construction is to begin, except in the case of emergency construction projects, in which case notice will be given as soon as practical. The notice will provide information on the district's obligation to provide a safe school environment during construction projects. The notice may be given by publication in the district newsletter, on the district website, direct mailings, or by holding a public hearing on the project.
5. Revise the district's emergency management plan, when appropriate, to include the handling of appropriate hazardous material.

During Construction

1. Monitor construction and maintenance activities to check for safety violations and to ensure that certificate of occupancy requirements are continuously maintained.
2. Investigate and respond to health and safety complaints.
3. Conduct fire drills during construction to familiarize students and staff with revised emergency procedures.
4. Ensure compliance with statutory and regulatory requirements regarding noise abatement, exits, ventilation, air quality, fire and hazard prevention, chemical fumes, gases and other contaminants, asbestos abatement and lead paint and radon testing and mitigation.
