

PESTICIDES AND PEST MANAGEMENT

The Board of Education is committed to maintaining the integrity of school buildings and grounds while protecting the health and safety of students and staff and maintaining a productive learning environment.

The Board recognizes that pests can pose a significant risk to health and property and there may be significant risks inherent in using chemical pesticides in the school environment. Generally, pesticides will not be used on district playgrounds, turf, athletic or playing fields, unless there is an emergency. Emergencies will be handled in accordance with applicable law and regulation.

Provisions will be made for a least toxic approach to integrated pest management (IPM) for all school buildings and grounds in accordance with the Commissioner's regulations. Integrated pest management is a systematic approach to managing pests focusing on long term prevention or suppression with minimal impact on human health, the environment and nontargeted organisms.

Notification of Pesticide Application

All district staff and parents/guardians will be notified of pesticide applications performed at any school facility. A notice will be sent at the beginning of the school year which will include:

1. Notification of periodic pesticide applications throughout school year.
2. The availability of 48-hour prior written notification of pesticide applications to parents and staff who request such notice.
3. Instructions on how to register with the school to receive this prior written notification.
4. The name and number of the school representative who can provide further information.

A separate notice will be sent to staff and parents within two days of the end of winter and spring recess and within 10 days of the end of the school year which includes the date, location and product used for each pesticide application which required prior notification and
